LEAN CANVAS — LEARNMATE AI

SDG 4: Quality Education | Concept-stage project canvas

PROBLEM • One-size-fits-all study resources • Learners need more practice and clear next steps • Language/difficulty barriers	**SOLUTION** • Level-aware explanations • Short practice questions and hints • 15-minute study plan	**UNIQUE VALUE PROPOSITION** A simple, self-paced study companion that adapts the learning flow to topic, level, and confidence.	**UNFAIR ADVANTAGE** Early-stage concept only. Potential advantage: teacher-reviewed local-language content and transparent, privacy-first design.	**CUSTOMER SEGMENTS** • School learners • Teachers and parents • Community learning centers
KEY METRICS • Session completion rate • Learner-reported clarity • Practice-question completion • Teacher content review score	**CHANNELS** • School/college demos • Teacher networks • Learning clubs • Project website	**COST STRUCTURE** • Content review and authoring • Hosting/domain (future) • AI/API costs (only if integrated) • Accessibility and testing	**REVENUE STREAMS** Education/NGO partnerships; institution licensing or grants could be explored later. Keep the student prototype free during validation.	**EARLY ADOPTERS** Teachers seeking extra practice resources; students who want guided revision; community education programs

Assumptions to validate: learners find the study flow useful; teachers consider the sample content appropriate; language support improves accessibility. This canvas describes a proposal, not validated business results.
